

"DELTA" & "MOON" SCULPTING SAND

- Same properties as wet sand yet is completely dry and wipes off easily
- Easy to mold and sculpt
- Always re-usable, it won't dry out when exposed to air
- Malleable, hands-on materials that can be used in the classroom by multiple children... **and be sanitized!** Use bleach & water or hydrogen peroxide & water solution to sanitize. Simply spread the sand out in a tray, mist the sand and let air dry
- You can bake it in a conventional oven at 250 F° for 1 hour and it sets up like stone which makes it great as a sculpting medium. When an artist is sculpting the material the scrapings are re-usable. You can paint your sculpture, or if you don't like the result, simply reheat it and while it is cooling you can crumble back into the sand and it's ready to use
- **Working on handwriting skills?** Simply compress the sand in a tray... and you have a wax-like tablet to practice writing
- Pinch and shape the sand into letter shapes to work on alphabet awareness

WARNING:

CHOKING HAZARD--Small parts
Not for children under 3 yrs.
